2. (New) An apparatus for electronically delivering a document to a receiving system over a network, comprising:
 - a server system connected to the network and storing digital information received over the network; and
 - a sending system connected to the network transmitting digital information to the server system, the sending system optionally sending a notification to said receiving system;
 - a receiving system that communicates with the server system to determine when digital information in whole or in part is available;
 - and in which server system provides any part of the digital information transmitted by the sending system to the receiving system as a random access resource, where said receiving system can access any available part.
